# Imagesea

My Website is Imagesea, where you can find Images you wish. You can know how many people liked the Image and how many people have seen the Image from my website. There are several results for your Wish. You can see all the Images.
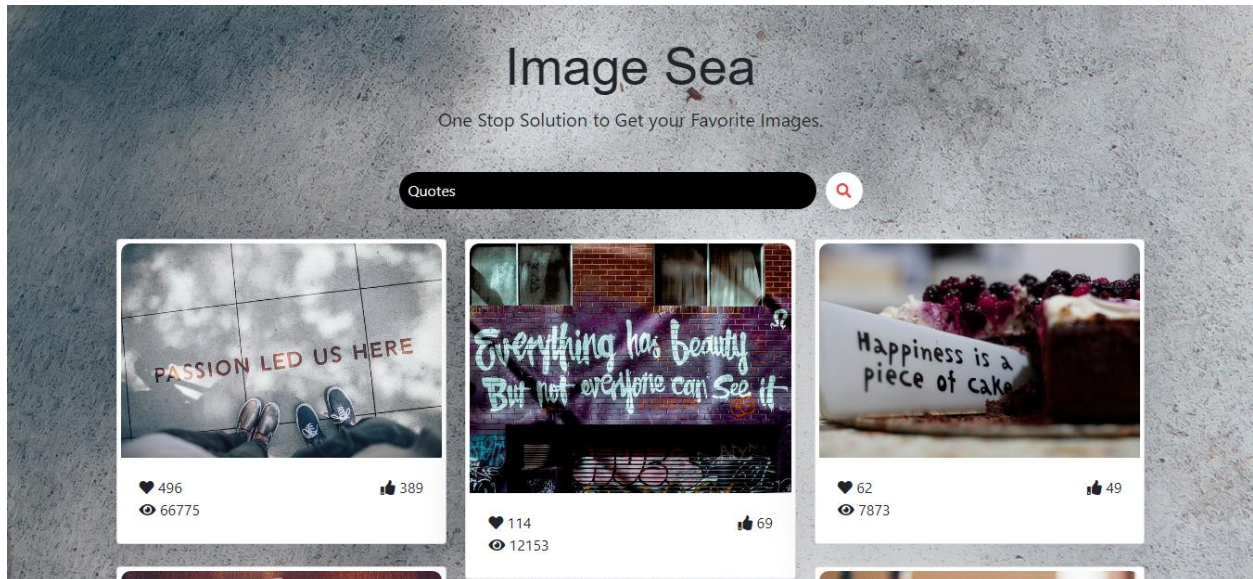

I have used Pixabay API to get Images for my Website. Which is a Free access API. You can simply login to Pixabay to get the Key to access the API.

I have hosted my website in AWS platform. You may access my website anytime. So when you click on the URL you are redirected to Imagesea website. Where you can find the search bar. Which you can use to search the Images you wish.
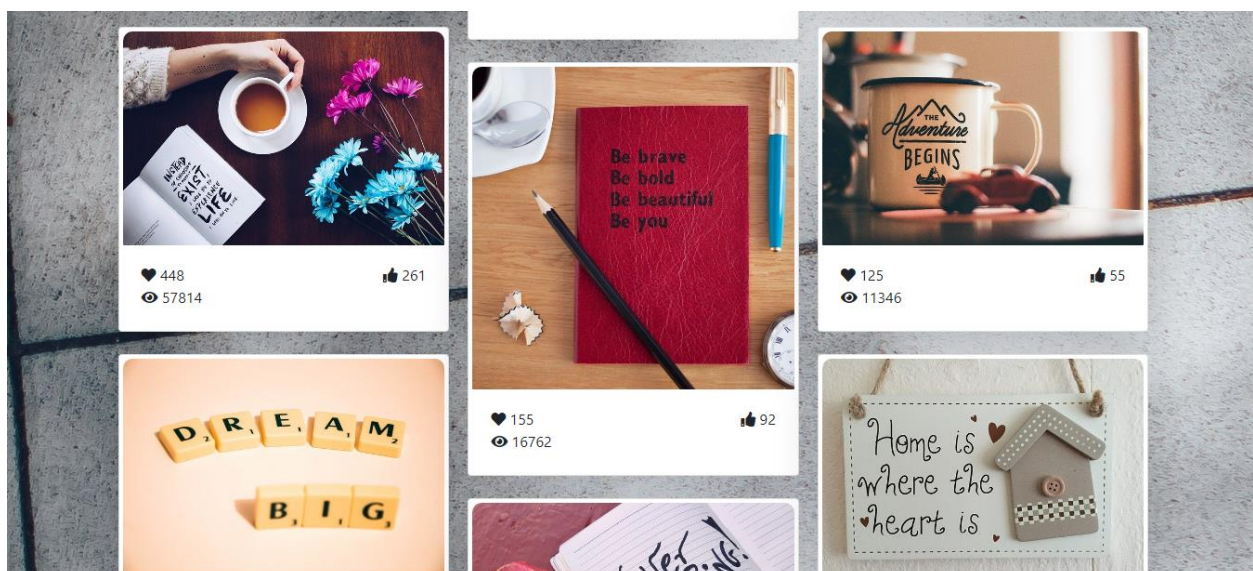

The Search, results in the Images you wished. You can see all images with Likes count, Favorite Count, and View count below the Image.

Where you can know how many similar Interests you got! .

The UI design is Portrait Photos like Format.

In the Footer you can find the Information like Who created this Website and What API I used to create this Website.
